Treasurer:

Brian Wraxall

Fred Clarke has been growing orchids for 30 years and has been hybridizing for 22 of those years. With over 24 years as a professional grower and manager in the horticultural industry, Fred applies these skills at his orchid nursery; Sunset Valley Orchids, located in San Diego, California. His pioneering work in *Catasetum* intergeneric hybrids led to the development of several notable hybrids, most recently the grex, *Fredclarkeara After Dark*, which produced "the **blackest** flower ever witnessed". This grex has received five FCC's and three AM's on the first flowers shown for judging! Fred is an Accredited Judge in the Pacific South Judging Region. His plants have received hundreds of quality awards from the American Orchid Society.

Catasetum, *Cycnoches* and *Mormodes* are three related genera from the Tribe Cymbidieae. Individually, each has been considered an orchid oddity, or "botanical", of interest mainly to the seriously addicted enthusiast. These plants have a brief deciduous period in winter, when the plants need a definite dry rest period bordering on neglect. These robust orchids are native to lowland tropical forests in Central and South America and are usually grown in warm or intermediate conditions.

Speaker's Dinner will be at [Pasta Pomodoro](#) located in Pleasant Hill at 45 Crescent Dr. Everyone is welcome to attend and meet our speaker. If you plan to attend, please notify Liz Charlton at (925) 280-1671 or email dvosnews@gmail.com

Plant table will be provided by Fred Clark.

Members may preorder plants from Fred at a 10% discount, by ordering from <http://www.sunsetvalleyorchids.com>

Our speaker in September was Marni Turkel

To rest or not to rest? That is the question. The answer to the question was Marni Turkel's goal in her lecture to the Diablo View Orchid Society at the September meeting.

Which orchids require a winter dry rest and which orchids do not? Marni's answer to this question draws mainly from her personal research and trial and error with her own orchids. Research is your best clue when deciding which orchids should go without water in the winter months. Marni looks at the origins of an orchid species. Then she looks at the temperature and rainfall for that particular region of the world. If in the coolest months of the year there is also very little rainfall, then this is the environment you need to try to duplicate for that particular orchid species. Mexico is a good example. Large portions of Mexico are hot and rainy in the summer months and dry and cold in the winter. Orchids from this region of the world will require a dry rest in the winter to do their best.

The dry rest is usually November through April in California. Watering less often is not necessarily considered a dry rest. A good dry rest consists of no water at all with just a slight misting if the plant is shriveling.

In regards to fertilizer, Marni recommends that you decrease fertilization leading up to the dry rest. Then, during the dry rest, there should be no fertilizer at all. In the spring a gradual increase of fertilizer should be applied.

The following is Marni's list of orchids that she has found need a dry rest: Aerangis, Angraecum, Baptistonia, Barkeria, Bifrenaria, Calanthe, Coelogyne, Dendrobium (bensoniae, folconoss, jenkinsii), Encyclia, Laelia anceps, Lycaste, Neofinetia falcata, Oncidiums-some varieties, Phalaenopsis-some varieties, Polystachya, Rodriguezia, Rossioglossum, and Tricoglossum

Liz Charlton said it best at the end of the meeting. "I'm still not sure which orchids to rest or not to rest, but at least now I'm educated." I think a lot of us feel the same way Liz.

Thanks again Marni.

DVOS Show

Chairwoman:

Kathy Barrett

Our show continues its theme depicting orchids from around the world. We'll need club member's orchids to fill the display. Don't be shy! Without your orchids we'd stand in an empty room and stare at each other. Where's the fun in that? So Please bring in your orchids!

Kathy Barrett will demonstrate cleaning and staking for good display at 7:00 PM just before the start of the October meeting.

Set up night for the show is *eight days after* our meeting so you'll have some time to clean up your babies. Plants brought to the meeting will be taken to the show by Dave Tomassini, but please have them cleaned, staked and labelled with your name. Some plants its better for you to hold onto and bring to set up yourselves, one's that require certain conditions or that haven't quite opened to perfection yet. So bring those to set up day yourself. Set up day is Friday 10/17. We'll be at the Community Center from 3 to 8PM. (see map on flyer) Well. We have to be out of there by 8PM so get there earlier so we have time to label and arrange your plants.

G. pubescens

Diablo View Orchid Society

October 2008

If you can't make it to the meeting the general idea on cleaning your plants is: Preparing orchids for the show:

- 1) wipe any dust or water spots from the leaves with milk.
- 2) stake the flower so it 'looks at you'.
- 3) put your name on the pot
- 4) keep a list of the plants you bring in so you know what to pick up.
- 5) bring it to the community center on Friday OCT 17.

We will be there 3 to 8 PM.

I'll have the sign-up sheets for members to work at the show at the October meeting. Right now it looks like I have volunteers for the mornings but the afternoons look skimpy.

If you can help out you'll have my undying gratitude! I really want to beg members to participate in ribbon judging, too. Its a great way to learn and decision making isn't difficult. You can't make a wrong mistake. As a matter of fact the more people that participate the easier it is to decide. (weird, huh?) So please join us! Ribbon judging starts at 9AM on Saturday Oct 18th.

Members can sell orchids too! Brian Wraxall has sales labels for your plants at the October meeting and at set up 10/17. He'd like to have your sales plants ready and in place on set up day Friday 10/17, so they are ready for the opening crowds on Saturday, so don't delay getting labels from Brian. Remember we all have to share space, so members are limited to 25 plants or an area about 3x3. The club takes 25% of the proceeds, so price accordingly! We'll be there 3 to 8PM on Oct 17.

Bring this I.D. tag with any plant you are selling, to the drop off on Fri. Oct 17

Membership News

Let's give a warm welcome to Sheila Scott from Alamo who joined DVOS in August and Elizabeth & Rudy De Los Reyes from Vallejo and Paula La Pointe from Crockett, who joined in September. This increased the DVOS membership to 101.

If you still don't have a copy of the 2008 roster and would like one, see me at the October meeting or send me a message.

Inventory reduction sale at D & D Flowers

Fall Open House on October 4th and 5th, 2008, 9:00 am to 4:00 pm. There will be specials on hundreds of good plants at \$7.50 each.

We are located in Half Moon Bay 1/3 mile east of Main Street off Hwy 92. Just east of Spanish Town on Hwy. 92 there is a house and firewood business. Turn onto the street between the house and firewood business and go over the bridge into the greenhouse complex. D & D Flowers is the first greenhouse on the right. If you go beyond the large dinosaur statues in front of the house and Spanish Town and you are at Main Street, you've gone too far.

Help your local orchid society. For every \$25 you spend, you may enter your local orchid society in a raffle for their monthly opportunity table. 40 healthy plants (some in bloom) will be awarded to the winning society. Winning society will be picked at the end of Sunday October 5th. The society must redeem their prize to D & D Flowers by the next open house which will take place in May of 2009
Mahalo!
