Laelia anceps 'Rebecca T. Northern'

Bloom photo for reference only
NOT this plant
Plant photo IS this plant

- Species native Mexico, Guatemala, and Honduras. The habitat is varied and plants may grow somewhat higher or lower in cooler or hotter climates in both shady and sunny locations. The varied habitat indicates an adaptability that explains why plants are usually considered easy to cultivate.
- This cultivar received an HCC/AOS in 1979.
- Large plant, 6 bulbs, 2 new growths, both new growths IN SPIKE.
- This plant prefers bright, indirect light, cool to warm temperatures. Very tolerant to growing outdoors. Just don't let it freeze.
- This plant has been growing in an intermediate greenhouse in Bolinas.
- VIRUS TESTED August 2023-ORSV and CyMV free.
- Donated by Tom Pickford.
